

A COMMITMENT TO SERVICE

Clearfield MMG
resourceful waste management

We provide innovative people who possess a depth of resources and the dedication of a true business partner. We understand the value of our environment and we clearly recognize the value of your business.

CLEARFIELD MMG | AN INTRODUCTION

Since 1991, Clearfield MMG has been a leading provider of specialized environmental remediation and waste management services in the Mid-Atlantic region. Our strategically located facilities are permitted to accept your non-hazardous wastes, including those generated on CERCLA sites. Regardless of the project size, from one drum to thousands of tons, Clearfield is your single source for comprehensive and resourceful waste disposal solutions.

In addition to facility operations, Clearfield MMG offers a

broad array of professional and support services to a wide range of customers. From waste sampling and analysis to landfill monitoring, Clearfield has the expertise and equipment to help you manage your company's waste programs.

In all that we do, our record of environmental, health and safety compliance is unmatched. As a result, we are committed to providing the safest and most secure work environment possible for our employees, customers and the communities we serve.

We are proud to surround ourselves with a team of employees who provide an unrivaled level of competence and integrity during the performance of their job.

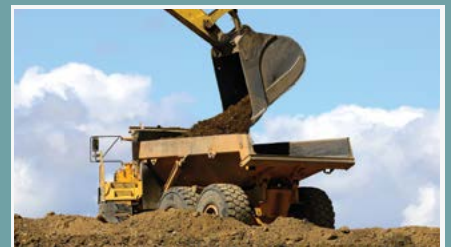

Non-Hazardous Solids

Clearfield MMG operates two waste management facilities in eastern Virginia, both of which are fully permitted by the Commonwealth of Virginia Department of Environmental Quality and hold EPA approval to accept non-hazardous waste generated on CERCLA sites. Each facility has been designed to exceed current regulatory standards and incorporates the most advanced environmental protection features available. We maintain an unparalleled record of compliance with health, safety and environmental regulations.

- Unlike many facilities, we do not sell or otherwise use treated materials for any off-site purposes. Our treated materials are exclusively used by an on-site Subtitle D landfill as daily cover.

WASTE TREATMENT & DISPOSAL

- Bioremediation of Petroleum Contaminated Soil
- Spent Sorbent Pads, Rags, & Boom
- Non-Hazardous Contaminated Soil & Debris
- Industrial Process Waste
- Special Waste
- Non-Hazardous Investigation Derived Waste (IDW)
- Automotive Service Industry Waste
- Filter Cake
- Spent Abrasive Material
- Dredge Sediment

Waste Transportation

As a leading provider of specialized waste treatment and disposal services, Clearfield MMG has the knowledge and ability to meet the diverse loading and transportation needs of our customers throughout the Mid-Atlantic region. Our modern fleet, operated by highly skilled and dependable professionals, includes vehicles for every waste transportation need, such as roll-off trucks and containers, vacuum trucks, box trucks, and dump trucks.

Regardless of the type or quantity of waste, you can be certain that Clearfield MMG will treat your transportation and disposal needs with the highest priority and utmost attention.

WASTE TRANSPORTATION SERVICES

- Liquids, solids, sludges, soil, and debris
- Vacuum Truck
- Roll-off Truck and Containers
- Dump Truck
- Box Truck

PROFESSIONAL SUPPORT

- Waste Profile Review and Preparation
- Shipping Manifest Review and Preparation
- Waste Analysis and Characterization

Drum Management

Clearfield MMG provides safe, dependable, and cost effective containerized waste management services for customers, large and small. The transportation and disposal of drums, pails, totes, and cubic yard boxes is simply one more service our customers rely upon us to expertly perform, while adhering to complex environmental regulations.

Regardless of the project size, from one drum to many totes of soil or sludge, Clearfield MMG is your single source for comprehensive and resourceful waste management solutions.

Environmental Field Services

In addition to facility operations, Clearfield MMG offers a broad array of professional and support services to a wide range of customers.

Liquid Solidification

Clearfield MMG operates the only facility in Southeastern Virginia which is permitted by the Department of Environmental Quality to receive and treat non-hazardous liquids and sludges. Our Chesapeake Plant, constructed with the most advanced environmental protection features, is complete with a double synthetic liner beneath the entire solidification area and a leak detection & collection system. The facility is proud to possess an affirmative determination from the EPA for the acceptance of non-hazardous waste generated on CERCLA sites.

WASTE TREATMENT & DISPOSAL

- Petroleum Tank Bottoms and Sludges
- Marine Bilge Wastes
- Sanitary & Storm Sewer Grit
- Car Wash Sludge
- Oil / Water Separator Sludge
- Non-Recyclable Liquids
- Inks, Dyes, & Resins
- Off-Spec or Expired Products
- Latex Paint
- Used Petroleum Products
- Automotive Service Industry Waste
- Filtration Media

Compressed Gas Cylinder Management

Discarded compressed gas cylinders present complex health, safety, and environmental concerns for the waste management and metal recycling industries. Clearfield MMG provides on-site cylinder management services, utilizing experienced professionals and mobile equipment. All management activities are carried out with an emphasis on returning these valuable metals to the customer. In most instances, our field technicians can identify the contents of each cylinder, relieve the internal pressure, and remove the valves, leaving nothing but recyclable ferrous and non-ferrous metal behind for processing.

Each year, Clearfield MMG manages thousands of gas cylinders for customers in the Mid-Atlantic region.

For more information on cylinder management or other transportation and disposal options, contact us at (757) 549-8448. Put our commitment to service, experience, and integrity to work for you.
